

My Simple User Utility

My simple user utility is a system that gives privilege to the authorized person to manage and manipulate user account. This system includes the assigning of user's access. And same as all secured system, my simple user utility is a system that requires username and password in order to access it. After inputting correct username and password command buttons will display, these command buttons are consist of the information of all roundcube system users that can be manipulated and managed.

The screenshot shows the My Simple User Utility interface. At the top, there is a navigation bar with a 'Pages: 1' dropdown, a 'User Account:' input field, and a 'Search' button. Below this are five icons with labels: 'Add Account', 'Refresh', 'User Admin', 'Change Password', and 'Exit/Close'. The main content is a table with the following columns: 'User Name', 'Full Name', 'e-Mail Address', 'Quota (in bytes)', and 'Active Account'. The table lists 15 users with their respective details.

User Name	Full Name	e-Mail Address	Quota (in bytes)	Active Account
rmdcbo4		rmdcbo4@local.com	3,400	YES
rice_mktg_ka_sup2		rice_mktg_ka_sup2@local.com	3,000	YES
e170sh		e170sh@local.com	3,000	YES
e508hr		e508hr@local.com	3,000	YES
seeds_ric_staff2		seeds_ric_staff2@local.com	3,000	YES
jcsy		jcsy@local.com	3,000	YES
kikotan		kikotan@local.com	3,000	YES
e508hr2		e508hr2@local.com	3,000	YES
rmdsup5		rmdsup5@local.com	3,000	YES
rdllada		rdllada@local.com	3,000	NO
e200sh		e200sh@local.com	3,000	YES
e509ic		e509ic@local.com	3,000	YES
jbdeguzman		jbdeguzman@local.com	3,000	YES
jcclarin		jcclarin@local.com	3,000	YES

Inputting user account on the upper part of the system and clicking search button, will sort what user account the user wants to view.

The screenshot shows the My Simple User Utility interface after a search. The 'User Account:' input field now contains 'rmdcbo4'. The table below shows only one user, 'rmdcbo4', with their details.

User Name	Full Name	e-Mail Address	Quota (in bytes)	Active Account
rmdcbo4		rmdcbo4@local.com	3,400	YES

Below search engine there are different buttons for the user to manipulate roundcube but not all users had a similar access. As of the example we are using the user account that has all the access in the system. Below the buttons is the table of user's information. In this table user can edit the user's information by simply clicking the edit button  placed in the first column then

click save and it can also be deactivated/activated by clicking the red button  placed in the second column then click OK button (in the message box) to finally deactivate/activate the account.

ADD ACCOUNT BUTTON

Clicking add account button, is a command to display the modal in adding user account. All fields in the modal are required. 3000bytes is the normal size of quota which is equivalent to 2.9 GB and there's a default password in adding user account but user can still set password by just clicking the Initialized Password checkbox and then input the preferred password to the textbox provided. Then clicking save button will add the inputted user account.

Add User Account...

User Account :

User Full Name :

Company :

Department :

Position :

Password : Initialized Password

Quota : (in bytes)

Active

REFRESH BUTTON

Refresh button will command the system to reload the system from the module after it was login.

USER ADMIN BUTTON

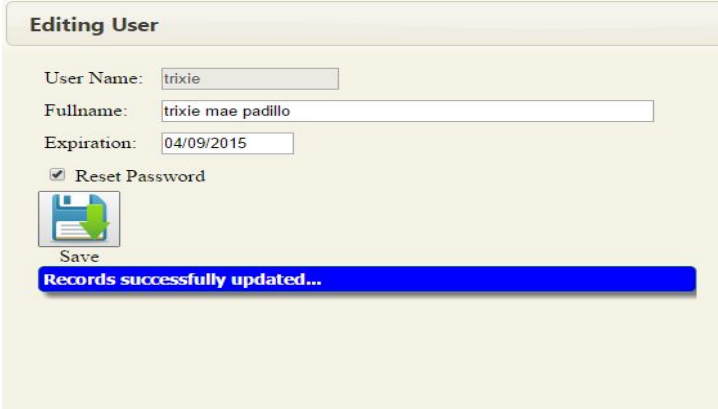

After clicking user admin, user management module will display that consist of adding of user admin and display the list of the users together with its username, full name and expiration access. The list is editable; it can also be deleted by clicking the respected buttons placed in the column of the table.

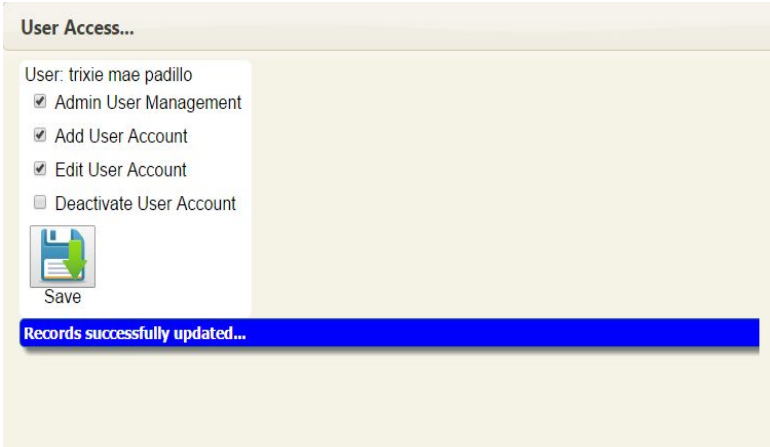

User Management...

	User Name	Full Name	Access Expiration
  	admintec	ARVIN DILAPDILAP	01/01/2099
  	jcmiravalles	Jeremy C. Miravalles	09/09/9999
  	mebrillantes	mebrillantes	09/09/9999
  	helpdesk	Paul	09/09/9999
  	trixie	trixie padillo	04/09/2015
  	admin	user admin 2015-02-18 16:20:36	00/00/0000

- **Edit User Button**  - this button is for editing the user's information (full name and expiration date). This button also can reset the password of each user by simply clicking the check box beside Reset Password label. Then clicking save button will update the account of the user.

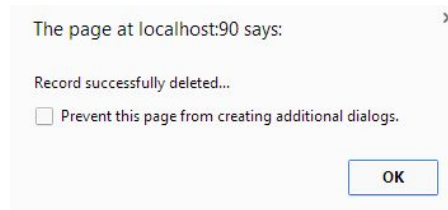

- **User Access Button**  - this button is for assigning what are the modules a user can access. The assigning of user's access can be done by simply clicking the checkbox beside the name of each module. Then similar in editing user account clicking save button will update the access of each user.

- **Delete Button**  - this button is for removing/deleting a user account. After clicking delete button of a selected user name, a message box will appear for the confirmation. Clicking OK button will permanently delete the selected user.

Then another message box will display for the final output.

Clicking OK button of the new message box will reload the system to the updated records.

CHANGE PASSWORD BUTTON

This module will give user the privilege to update their password. Old password of the user is required for verification. Then clicking save button will update the account. No old password, no updating of account.

EXIT/CLOSE BUTTON

This button will logout the account of the user and returns the system to the login module.
